

创建表

分区表

```
create table test_t2(words string,frequency string) partitioned by (partdate string) row
format delimited fields terminated by ',';
```

orc表

```
CREATE TABLE IF NOT EXISTS bank.account_orc (
  `id_card` int,
  `tran_time` string,
  `name` string,
  `cash` int
)
stored as orc;
```

插入数据

```
insert into tablename values('col1', 'col2');
```

```
INSERT INTO table_name (column1, column2, column3)
VALUES
(value1, value2, value3),
(value4, value5, value6),
(value7, value8, value9);
```

```
INSERT OVERWRITE TABLE tb
select * from tb2
;
```
